Dealer Information

Affordable digital electronic devices and powerful PCs on the mass market have been the driving forces behind the amazing success of digital media applications in the consumer market over the last few years - and this dynamic market is expected to continue its fast growth over the coming periods.

This phenomenon is seen clearly in the fact that more than 7 Million copies of Pinnacle Studio have been sold worldwide over the last three years, making Pinnacle Studio the reference for consumer video editing applications.

And now, introducing Pinnacle Studio version 9.

Pinnacle STUDIO

Easy, Powerful, Creative Video Editing

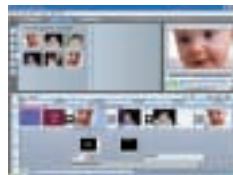

AS SIMPLE AS ONE, TWO, THREE: THE STUDIO 9 MOVIE MAKING EXPERIENCE

Studio 9 software is as simple or advanced as a home movie maker needs.

Step one is a fast automated import and logging of raw footage into albums from almost any camcorder.

At **Step two**, imported footage is transformed into an entertaining story with one click using the SmartMovie™ feature. For the more advanced enthusiast, Studio 9 combines a host of creative editing tools and powerful features that include transitions, titles, video and sound effects and automatic or imported music making options.

At **Step three**, after a movie is completed, there are many options for preserving and sharing it with family and friends. A Studio 9 movie can be burned onto a disc that can be played back on nearly any DVD player, transferred to tape, saved to the web or even shared across a home network to be viewed on demand!

FAST & EASY MOVIE MAKING WITH SMARTMOVIE™

Video editing is faster and easier than ever with SmartMovie™, Studio v.9's automatic movie creator. Users simply select raw video footage, add a favourite song for a soundtrack, and choose an editing style for their finished movie. With one click, Studio will create a professional looking movie-complete with titles, transitions, and special effects-all synchronized to the beat and duration of the music.

Create SmartMovie

HOLLYWOOD CREATIVITY WITH HOME CINEMA FEATURES

Pinnacle Studio v.9 empowers consumers to create a true home cinema experience through sophisticated audio and video cinematic tools. Surround-sound gives users an intuitive control to place, or move, the movie's audio elements within the surround sound space, creating scenes with more dramatic audio impact. And for the first time at this price level, consumers who shoot video in wide-screen (16 x 9) can edit and export their movies for wide-screen playback, taking full advantage of their big-screen televisions or HD ready monitors.

POWERFUL VIDEO & AUDIO ENHANCEMENT TOOLS

Pinnacle Studio v.9 gives users a powerful suite of new audio and video enhancement features that restore and enhance video and audio in a number of ways. These include: automatic color-correction that rescues poorly lit footage or brightens old movies before burning to DVD; image stabilization which steadies shaky footage to produce a rock steady final movie; video cleaning tools to remove snow and video noise often seen on older analog tapes; and noise reduction tools that give users the ability to remove background noises, such as wind, from the finished movie. Studio 9's open architecture provides support for third party developers to incorporate their video and audio plug-ins, which over time will extend users' creative options.
