Reasons to Buy

Pinnacle EDITION

01 Over 1000 Real-Time Effects

Pinnacle Edition is the first professional non-linear video editing application to utilize both the CPU and GPU (Graphics Processing Unit) to provide more than 1000 real-time 2D/3D effects including advanced color correction, chroma/luma key and more.

Over 1000 Real-Time Effects

02 Integrated Timeline Based DVD Authoring

Create DVD/VCD/SVCDs with motion menus, motion buttons and automatic links, directly from the timeline with our easy-to-use DVD wizard. No need to export your timeline to a separate application.

DVD Authoring directly from the Timeline

03 Background Processing

For more efficient workflow, this unique feature finishes the timeline and generates your final DV content as you work.

04 Sub Pixel Processing Engine

Delivers the highest video quality available on a PC based Video editing system. Why settle for less?

05 InstantSave Technology

With our unique InstantSave technology every edit you make will immediately and automatically be saved.

06 Customizable UI and Keyboard Shortcuts

Menu bars and keyboard shortcuts are adaptable to individual needs and can be stored in multiple user profiles. Edition lets you work the way you work.

Storyboarding

07 Automatic Scene Detection

Based on time code or video content Pinnacle Edition divides the scenes into individual clips to let you focus on the creative process rather than sorting through your footage to find the clips you want.

Customize your keyboard

08 Full Onscreen DV Preview

Pinnacle Edition supports a fully scalable UI for up to 1600 x 1200 resolution and a full size Preview Window to accurately check your work.

09 Desktop Storyboarding and Timeline Editing

Optimize your workflow by easily switching between storyboard and traditional timeline views.

10 Unlimited Video, Audio and Image Tracks

For the ultimate in creativity, Edition remove all barriers to your artistic expression and lets you work with all the content you need all at once.
